
ASSEMBLING INSTRUCTIONS AND WARRANTY

RESISTIVE LEVEL INDICATOR

- Position and fix the level indicator on the Multivalve as indicated in the picture A using the screws (1) and (2) supplied in the kit. It is possible to change slightly the kilometres that can be covered when the car is running empty, carrying out the indicator assembling in the following ways: if the fixing procedure is carried out rotating the indicator counterclockwise the kilometres are reduced, rotating clockwise they increase.

- Carry out the electrical connections using the cable supplied in the kit (Picture B). Insert the female connector (5) and the rubber protection sheathing (6) in the corresponding seats (7) in picture A.

- Connect the black wire with the eye connector (4) to the ground and the white wire (3) to the device with the Led indicator.

WARRANTY

OMB Saleri guarantees that each level indicator produced and sold is free from manufacturing or material defects. In order for OMB to restore the level indicator to the original functioning, the level indicator must be returned free port, within 12 months from the date of manufacturing with all its components and OMB's technicians must find it actually defective due to manufacturing.

The product must be used only on vehicles (cars, motorbikes, boats...) using LPG. The non-compliance of the assembling instructions and/or the maintenance carried out by unauthorized staff, will imply, besides the defective functioning of the level indicator, the complete annulment of this warranty. The warranty does not include damages deriving from transport or from or from circumstances not related to faulty level indicator functioning. All parts opened and/or tampered with by the customer are not included in this warranty.

OMB Saleri does not assume or authorize a third-party to undertake on its behalf any responsibilities related to the sale of its products. Moreover, OMB accepts no responsibility for direct or indirect damages of any kind, suffered by people or things during or after the level indicator installation.

For any controversies the competent place of jurisdiction is the court of Brescia.
